EDUCATION

Student-athlete at Carleton University

Bachelor of Computer Science (Minors in French and Music)

Ottawa, ON

Sep. 2022 – Present

TECHNICAL SKILLS

Languages: C, C++, C#, SQL, Java, Python, JavaScript, Ruby, HTML/CSS, Haskell, English, French, Chinese

Web Development: React, Node.js, REST APIs

Systems & Security: Linux, Computer Networks, Cryptography Basics, Secure Programming

Databases & Cloud: PostgreSQL, MongoDB, Google Cloud Platform

Tools: Git, VS Code, Visual Studio, IntelliJ, Excel

EXPERIENCE

IT Summer Student Co-op

May 2026 – Present

Department of Justice Canada, Information Solutions Branch (ISB) – Business Portfolio Services & Planning (BPSP)

Ottawa, ON

- Supported digital transformation initiatives by evaluating and documenting business processes and technical requirements
- Conducted software and AI tool assessments involving GitHub, Microsoft Copilot, ChatGPT, Claude, and related technologies to support technology adoption efforts.
- Collaborated with cross-functional teams to identify process improvement opportunities and support implementation of technology modernization initiatives.

E-Commerce Technology Intern

May 2026 – Present

Prookie Protein - Rüpen Labs

Remote

- Support optimization of a Shopify-based e-commerce platform and digital growth initiatives.
- Conduct SEO research, keyword analysis, and content optimization to improve online discoverability.
- Leverage Claude AI and analytics tools to evaluate competitors and recommend website improvements.
- Collaborate with stakeholders to identify and implement user experience enhancements.

Student Technical Team Summer Co-op

Jun. 2025 – Sep. 2025

Public Services and Procurement Canada (PSPC) — Government of Canada

Ottawa, ON

- Contributed to modernization of the Case/Client Relationship Management (CCRM) system replacing legacy Case Management Tools.
- Analyzed and reverse-engineered C# and Excel-based financial calculators, documenting logic and data flows for migration.
- Validated data schemas and identified input constraints to support transition to structured database-backed systems.
- Collaborated in Agile teams to produce technical documentation aligned with federal data standards (GCdocs).

PROJECTS

Insulin Pump Simulator

Jan. 2025 – May 2025

C++, Qt, Object-Oriented Design

Carleton University

- Collaborated in a team of 4 to develop an interactive simulation of a medical insulin pump system using C++ and Qt.
- Built event-driven UI with real-time data visualization (glucose graphs, insulin levels, battery status).
- Integrated error handling for critical system states (low battery, sensor failure), ensuring safe system behavior.
- Produced UML diagrams, use cases, and a requirements traceability matrix to connect design, implementation, and testing.

Health & Fitness Club Management System

Oct. 2025 – Dec. 2025

PostgreSQL, Python (COMP3005)

Carleton University

- Designed and implemented a relational database system supporting members, trainers, and admins using PostgreSQL.
- Developed schemas (3NF), ER diagrams, and relational mappings for 10+ entities.
- Built a Python Command-Line Interface application enabling operations such as metric tracking and class registration
- Wrote SQL queries to aggregate data across multiple tables (members, metrics, goals), optimizing retrieval of latest records.

LEADERSHIP & ACTIVITIES

Student Athlete – High-Performance Taekwondo Team

Sept. 2022 – Present

Phoenix Taekwondo Academy

Ottawa, ON

- Train and compete at the national and international level on the high performance Taekwondo team.
- Balance academic performance with over 14 hours of weekly training and consistently attending international competitions.
- Volunteer in leading and assisting students enrolled in Taekwondo after-school classes on a weekly basis.
